WORK EXPERIENCE

Front-end developer
Futuristic Labs

10/2021 - Present   *Tasks*
Projects
- Klynk app(mobile)
- Riku hmi & Klynk recipes (web)

PROJECTS

Klynk app(React Native)
- Created a comprehensive **shopping list** feature with add, edit, delete, and collaboration options for seamless ingredient management and sharing with friends.
- **Launched** the first version of Klynk on the **Play Store**, followed by eight subsequent versions featuring new features, optimizations, and UI revamps.
- Implemented the **guided flow** with sections, resulting in a remarkable 30% increase in user conversion rate.
- Integrated **codepush** to immediately deploy updates to users, bypassing the need for the app review process.
- Linked **AWS S3** to log user behavior on devices and analyze it for feature finalization.
- Successfully **migrated** the codebase from react native version 0.64 to 0.72, while also optimizing the components.
- Effectively **managed** a team of three individuals, providing guidance and support to achieve project goals.
- **Optimized** recipe addition in meal section by reducing the time required to 50% compared to the previous duration.

Klynk os(ReactJS)
- Built cloud triggers to **automate** modifications of recipe ratings and categories through actions on collections.
- Created payment gateway **API** by implementing RazorPay cloud function for the klynk web platform where creators can manage their subscribers.
- Reconfigured **firebase** collections to align with the required structure for specific features using scripts.

Riku hmi(ReactJS)
- **Delivered** initial version of hmi with meal plan and shopping list features UI and functionality on time.
- **Fixed bugs** discovered during initial test cycles.

EDUCATION

Bachelor in computer science
Lovely Professional University

08/2016 - 08/2020
Courses
- Major in web development
